COP

Common Operating Picture

See Everything. Decide with Confidence.

The Common Operating Picture (COP), powered by the Command & Control Suite (CS3) delivers a unified, real-time operational view by consolidating multi-source data into a single, dynamic map interface. Through seamless integration of tracking, monitoring, intelligence databases, and analytical tools, COP transforms raw data into actionable insight for faster, smarter decision-making. Designed to enhance situational awareness, coordination, and command effectiveness, COP provides accurate plotting, live updates, and secure information exchange—empowering leaders with a clear, comprehensive picture of the operational environment at all times.

Operation Support

The operation support offers sub-modules critical to the day to day management of the entire system, contributing to the service management lifecycle.

- Memo
- Activity Calender
- Messenger
- Data Repository System
- User Management
- Communication Interconnection System

Executive System

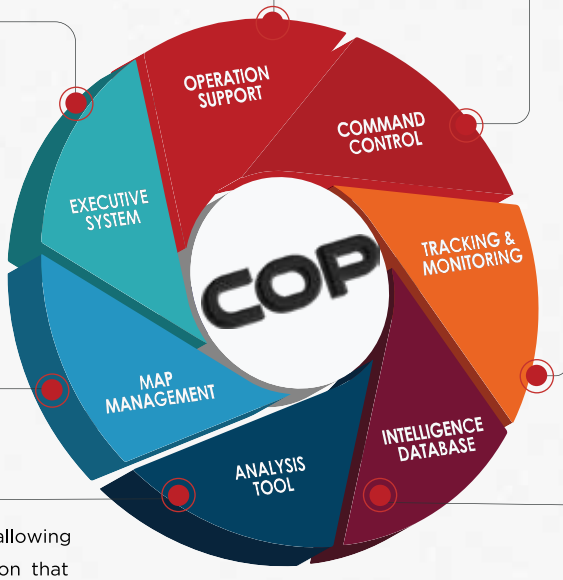

The system efficiently performs data acquisition, with added capability of generating attractive and meaningful infographic for insight discourse.

- Data Source Management
- Intelligence Product Generation

Command & Control

CS3's Command and control module is developed to help manage, monitor and communicate with all divisions and subsidiaries, bringing everything in order under a seamless systematic integration.

- Operation Dashboard
- Tasking & Reporting
- Secured Exchange Portal

Tracking & Monitoring

CS3 Tracing & Monitoring helps captures data from a wide array of sources, applications and formats, thus allowing derivation of accurate analysis for valuable business insights.

- AV Streaming
- Web Portal & Map Report
- Mobile Application & Web Portal

Map Management

Live situational view is critical for any tactical operation. The map management utilizes plotting system amongst others for accurate and calculated decision-making.

- Common Operational Picture
- Situational Awareness
- Map Report

Intelligence Database

The comprehensive and versatile management of data about a particular person, subject, object or incident in various formats.

- Target Management
- Data Profile
- Technical Profile

Analysis Tool

Analysis tool supports various types of data, allowing easy interpretation via engaging visualization that helps reduce decision-making time.

- Link Analysis
- Pattern Analysis
- Timeline Analysis
- Message Analysis
- Face Recognition
- Object Recognition
- Target Profiling
